# The Siamese

## About the Siamese

The Siamese cat is a breed that can make any person fall in love with him very easily. These cats have very deep, blue, gazing eyes, long bodies, and very thin tails. These cats are very devoted to their owners. When choosing a pet, you need to make sure that you research the pet very thoroughly; making sure that it can withstand your lifestyle. This book will cover all the basics from selecting a cat to its senior years. So please take a few minutes to look over all the information included in this book. This information can help you and your pet live in harmony and happiness.

Average Weight	8-15 Lbs	Temperament	Intelligent, loving, lap cat.
Average Height	Medium-sized	Good with Children?	Yes, good with children, but can be temperamental.
Coat	Short, single-layer coat	Health Concerns	Live long, healthy lives

## Siamese Characteristics

A Siamese cat normally has a small to medium sized body that is sleek and slender. The Siamese also has bright blue eyes and colored points on its ears, face, feet, and tail. These cats are usually light-colored. They require very little grooming due to their short hair.

The Siamese is a very intelligent cat with a very distinct voice, like the sound of a crying baby. A very people-oriented cat, the Siamese loves to spend time with his family, thus making it a traditional lap cat.

## Selecting Your Siamese Kitten

Making the decision to either adopt or purchase your puppy from a breeder is a matter of personal choice. Both options are discussed here, along with some positives and negatives for both.

## A Few Words About Adoption

Every year, thousands of animals are either captured or turned in by their owners to be adopted. These pets can make wonderful companions and desire a loving home to call their own. When considering adoption, you should chose an animal shelter or rescue in your nearby community that you trust and one that has a long-standing reputation for providing exceptional care to the animals. Shelters that have an on-site vet clinic are a plus. Many facilities will require the pet to be spayed or neutered before the adoption is complete. This fee will be included in the adoption costs.

## A Few Words About Breeders

Some people will prefer that their Siamese comes from a reputable breeder. This can be the best choice for owners wishing to show their cat or become breeders themselves. Breeders can provide you with a wealth of knowledge around Shorthairs, including health issues, family history, and the various breed characteristics. You can find cat breeders by looking in the newspaper, searching on the internet, or checking with the local vet. You should have a list of questions ready to ask the breeder when you visit or call. It is good to inquire about the length of time the breeder has been in business, if the parents will be available for you to see, and what kind of health guarantees and records will be provided. Expect a good breeder to have several questions for you as well, such as the environment in which the cat will reside, and how much time you will be able to spend with the cat.

Purchasing your Siamese from a breeder or adopting are both good choices. You need to be sure to do your research first and to avoid making a quick decision based on immediate availability. Sometimes it is better to build a relationship first with a chosen breeder and plan for an upcoming litter

## How to Choose your Siamese

Choosing a new kitten can be one of the most exciting events in your family. It is important that you have done your homework upfront and know what kind of cat you are looking for. Some things to look for when selecting your new kitten are:

- No major skin conditions; clean, healthy coat
- Clean and clear eyes
- Coughing or difficult breathing (signs of respiratory infections)
- Paw pads soft and no deep cracking or infections
- Limping, little or no movement (signs of injury or birth defects)
- Proper weight/size

## Bringing Your Siamese Home

Kittens are explorers, and everything for them is a potential adventure. Be sure to provide a safe and secure environment for your new friend. In an effort to prepare for the care of your new best friend, you should create a checklist and learn about the special needs of your pet. Make sure that your floors are free of clutter. This includes shoes and electric cords, as kittens like to explore and can sometimes chew. Use the rule "out of sight, out of mind" when introducing your kitten to his new environment. If you have other pets already, you should be sure that their food is in a safe place, at least in the beginning until everyone adjusts.

It's also a good idea to pick up a book on your kitten, so that you can further understand the breed and what sort of things to expect as they grow. Once your kitten comes home, you will want to make an appointment with your vet, if you have one already, or chose one based on a recommendation or by locale. If you have purchased your kitten from a breeder or animal shelter, they have most likely had their first set of shots. Regular visits to the vet will ensure your pet a happy and healthy life. Your vet will also be able to address any concerns, behavior issues, or other questions that you might have.

You'll need these basics before your Siamese comes home. Click the items below to go to CheapPetStore.com to find the best prices for online pet supplies.

### EXPERT TIP

#### Selecting a Bed

When choosing a bed you need to be sure to select one that gives your cat plenty of room. It should be cozy, yet roomy enough for your cat to move around a little. Beds come in a wide variety of designs. Some are simple, while others can be converted from a hideaway to a nest bed. Other beds are constructed of a harder material, such as like wicker or wool and covered in padding. This style is nice because it gives your pet the option of sitting either on top of the bed, or crawling inside.

## The Siamese Kitten

Each stage of your pet's life is characterized by special needs. Kittens' lives are full of learning experiences. Enjoy the time you spend with your Siamese kitten. Early socialization normally prohibits anxious behaviors from surfacing. Good habits, as well as poor ones, are established at this early age. Use consistent training methods and show your kitten your expectations in a positive way and you will not be disappointed.

## The Siamese Adult

As your cat begins to age, his needs begin to change. Keep surprises to a minimum by being prepared. Your cat should be active and healthy. A listless Siamese is unlikely, so watch out for any behavioral changes.

As your cat ages, his nails, paw pads, coat, skin, eyes and ears need ongoing attention. Make grooming a happy time for your cat. Since this breed does not mat its coat, grooming is easy. Also keep claws trimmed as needed and keep teeth tartar under control.

## The Siamese Senior

Older cats have different needs. Dietary changes are the most prevalent at this life stage. As your cat ages, so does his digestive system. Make sure your senior Siamese maintains a proper diet and receives proper nutrients by starting him on daily vitamins. Keep abreast of the latest trends in dental products. There are many tartar control products on the market today. You may want to provide a more appropriate sleeping and lounging area for your pet. You can help him manage his health with the proper pet healthcare aids, knowledge, and care.

Most cats are considered geriatric at age 10 and older. Most cats live until about 15 years. Senior pets have many changes in disposition and could easily be stressed by active young children. They may show signs of irritability when being handled. Siamese are genuinely loving animals and are not known to cause harm, but grumpy seniors have a way of making sure that you are aware when they are unhappy. It is important to know that senior animals tend to do things their own way and in their own time. Care for your senior in a loving, gentle manner mixed with a little patience and understanding.

## Medical Considerations

Asthma and other respiratory problems are common problems among Siamese cats. Owners need to control the amount of smoke and other irritants that their cats are subjected to. Also beware of dust and dander as this can trigger their asthma. Another problem that Siamese are prone to is dental problems. They tend to have gum disease and weak teeth so you need to make sure to take care of this issue. Consulting your veterinarian regularly will help control this problem. Finally, the last major problem that Siamese cats are prone to is kidney disease. Purebred Siamese are more likely to develop this disease, but other Siamese breeds can be afflicted with this as well.
